BUILDING ACTIVITIS RUDELY DISTURBED !!

General information.

as far as work was possible ?! But later more about that.

The early-book-offer is largely used we are very happy with/about it. It is

It is February the weather was, as almost everywhere in Western Europe rather stormy and wet as well. So work was privileged to sheltered places,

already clear that the booking record of 2007 in 2008 will be broken again.

Christmas holidays and celebrations have passed with the appropriate peace and quietude. Christmas together with

Ellen and Peter and new years eve with 7 French families, in the house of Sandra as already mentioned in the last newsletter. A nice happening for Sander as it was for us, and not TOO late (02.30) in bed.

In this newsletter, again little text and many pictures.

Sander (on the picture) together with his friend Charly, both in reindeer disguise, has decorated the Christmas tree. His half term report was very good again and his teacher very "content".

From Santa, he has a new bike, so his old one is for the "Les Aulnettes" children to be used.

Irene is very busy with the reservations for the oncoming season. We have already a lot more demands for the pre-season in comparison with last year !

(Grand)dad Wim has returned from the hospital after being liberated from a kidney stone. As a "kidney-stone-recidivist" he is used to that kind of business, but this was his first time in France and also a stone with a size from which our building budget could benefit enormously. Again, Wim has endured it as a big boy.

Frans is becoming a softie. No longer pain in the back, he now descends a ladder in a nutty way. There is more after this.

To be continued.

Real Estate Market in France still stagnating !

Actually, nothing to tell. We put the house on the Southomes Website and are waiting the beginning of the house-selling season (this is two weeks after the sales. But still, if you know anyone who likes to have a beautiful big house, with guestrooms in the yard and a swimming pool in France ... Let him or her call 0033 251 33 55 52. **To be continued again.**
